

23.8" IPS Monitor

This 23.8-inch Full HD (1920 x 1080) resolution monitor supports VESA Mount for versatile ergonomic positioning on a stand or wall. Likewise the IPS panel ensures 178-degree-wide viewing angles, in an elegant bezel-less design, without loss of high color quality – perfect when you're collaborating with business colleagues. Dynamic contrast in HDR mode enables a wide range of high-impact color at 104% of the sRGB color space. Multitasking is made easy by the availability of multiple screens in software, and the viewer's comfort is ensured by Flicker Free imaging, plus a Low Blue Mode. HDMI compatibility allows connection with a wide range of devices. The 'value-add' features include 2 built-in speakers.

Features

IPS Panel

IPS panel ensures an excellent viewing experience with lifelike yet brilliant and accurate colours. Colours look consistent no matter from which angle you look at the display

Upscaling content from standard to high definition

The AOC Clear Vision image performance engine upscales Standard-Definition (SD) sources to High-Definition (HD), resulting in sharper, more vivid viewing.

Adaptive sync

Adaptive Sync aligns your monitor's vertical refresh rate with the frame rate delivered by your GPU, making your gameplay and casual gaming experience even more fluid by eliminating stuttering, tearing and judder. This feature is also useful when enjoying videos and other visual media, for a smoother entertainment.

Frameless design

Besides looking modern and attractive, frameless designs enable seamless multi-monitor setups. Your cursor/windows will not be lost anymore in the dark abyss of bezels, when many displays are placed side by side.

Flicker Free

AOC Flicker-Free Technology utilises a DC (Direct Current) backlight panel, reducing flickering light levels. With eye strain and fatigue absolutely minimized, feel free to enjoy those long, intense gaming sessions in comfort!

Low Blue Light

AOC Lowblue Light protects you from harmful blue light which, during long sessions, has been shown to cause eye strain, headaches, and sleeping disorders. Our Lowblue Light feature reduces the harmful wavelengths emitted without sacrificing color composition, setting the experience free from the worry of eye damage.
