

## 9E1HA

Love your eyes with AOC's 9E1HA, an 18.5-inch monitor carefully crafted with protecting your eyesight in mind. Flicker Free backlight technology eliminates the pulsating LEDs associated with headaches and eyestrain, while Low Blue Mode filters harmful shortwave blue light – with four levels to suit different viewing situations. Elsewhere, the 9E1H is multimedia ready with an HDMI input, equipped to split the screen into eight workspaces with Screen+ and optimised for low energy usage thanks to the intuitive e-Saver feature.

## Features

### Low Blue Light

AOC Lowblue Light protects you from harmful blue light which, during long sessions, has been shown to cause eye strain, headaches, and sleeping disorders. Our Lowblue Light feature reduces the harmful wavelengths emitted without sacrificing color composition, setting the experience free from the worry of eye damage.

### Flicker Free

AOC Flicker-Free Technology utilises a DC (Direct Current) backlight panel, reducing flickering light levels. With eye strain and fatigue absolutely minimized, feel free to enjoy those long, intense gaming sessions in comfort!

### Upscaling content from standard to high definition

The AOC Clear Vision image performance engine upscales Standard-Definition (SD) sources to High-Definition (HD), resulting in sharper, more vivid viewing.

### VA Panel

VA Panels (Vertical Alignment) display deeper blacks and a high contrast for extra vivid and bright images.

**GENERAL**

<b>Model Name</b>	9E1HA
