PURE CONTRAST, CONSISTENT BRILLIANCE

WOLED delivers deep blacks, smooth gradients, and balanced brightness that stays consistent across the screen, creating a refined, comfortable viewing experience that feels natural, immersive, and reliable for both work and entertainment.

LANDMARK TECHNOLOGY OF DUAL-REFRESH RATE FEATURE

Adapt to your playstyle by switching instantly between visual excellence and competitive performance with AOC's Dual Mode feature. Experience AAA gaming worlds in crisp UHD at 240Hz, or dominate the competitive scene with responsive FHD at 480Hz. From the rich details of story-driven adventures to the precision needed in competitive gaming, one display is all you need. Two distinct gaming experiences, zero compromises.

0.03MS RESPONSE TIME GTG - GREY-TO- GREY

GtG stands for Grey-To-Grey and represents how long it takes for one pixel to change between one gray level to the next. In gaming, every millisecond counts and can be the differentiator between hitting or missing a shot. Fast response time also eliminates ghosting and motion blur.

VESA CERTIFIED DISPLAYHDR™ TRUE BLACK 400

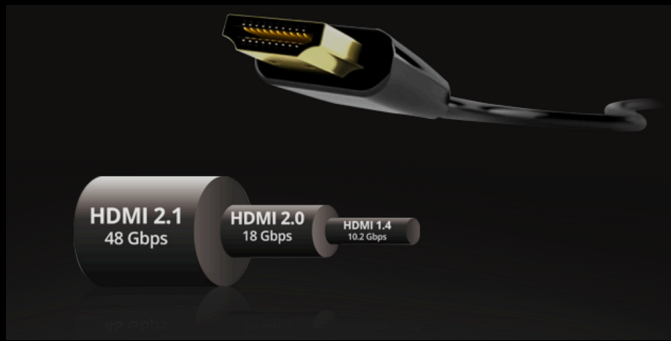

The DisplayHDR™ True Black 400 brings you deeper, more accurate black levels, making your viewing experience richer and more immersive. No more washed-out dark scenes in movies and games. With TrueBlack 400, you're in for a more realistic visual journey.

G-SYNC COMPATIBLE

Enable flawless picture quality by synchronising new generations of NVIDIA graphics cards* with this G-SYNC Compatible monitor. *Please refer to NVIDIA website for the complete list of GPUs working with G-SYNC Compatible monitors

HDMI 2.1

The latest standard in HDMI technology further boosts higher refresh rates and resolution. This not only opens new doors for watching content, but also for gamers: HDMI 2.1 enables next generation consoles to reach their maximum performance.
