

UNLEASH YOUR POTENTIAL

POWERED BY
CU34G4H/69

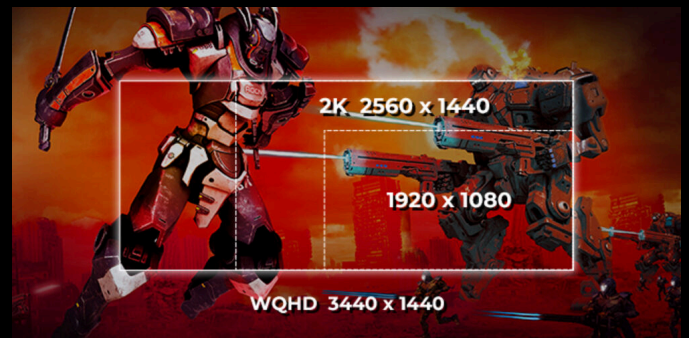

Dive into a 1500R curved Fast VA panel that draws you into every scene. HDR10 delivers vivid contrast, while a 200Hz refresh rate and 0.3ms MPRT response with Motion Blur Reduction keep motion crisp and fluid. Adaptive Sync / FreeSync Premium and low input lag ensure seamless, tear free gameplay. Gaming features such as Game Mode, Game Color, Dial Point, Shadow Control, and Dark Boost let you adjust visuals for clarity and accuracy. PIP/PBP supports effortless multitasking, Flicker Free and Low Blue Mode reduce eye strain during long sessions, and the height adjustable stand ensures ergonomic comfort. All settings are managed easily through G Menu. ...

WIDE QHD (WQHD) RESOLUTION

With 3440 x 1440 resolution, Wide Quad HD (WQHD) offers superior picture quality and crisp imagery that reveals every detail. The widescreen 21:9 aspect ratio is perfect for watching movies in an expansive format or immersing yourself in the latest game, plus it offers more space when it's time to work. True 8-bit color provides a broad color palette for vibrant, natural-looking images.

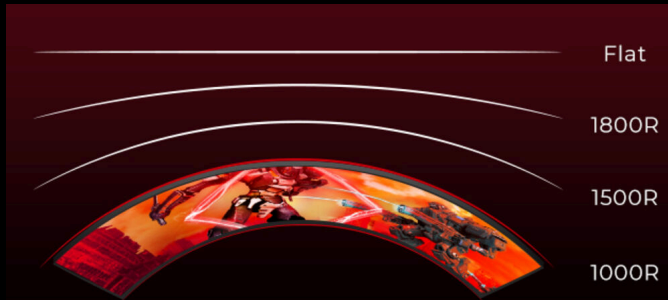

200HZ REFRESH RATE

A 200Hz refresh rate is more than triple the industry standard of 60Hz. Unleash the full potential of your graphics card: with screen tearing and motion blur and stuttering all eradicated, your game will finally flow like it was meant to, and your skills can reach new heights.

0.3MS MPRT RESPONSE TIME

Feel the truly immersive gaming experience. Whether you're navigating through a fast-paced racing game or engaged in a high-stakes battle, every millisecond counts! The 0.3ms MPRT monitor could be your ticket to gaming excellence, with quick reaction times and smooth gameplay.

1500R CURVED

Curved design wraps around you putting you at the center of the action and provides an immersive gaming experience.

Freesync PREMIUM

Enjoy the best quality visuals even in fast paced games. The AMD FreeSync Premium Technology ensures that the GPU's and monitor's refresh rates are synchronised, which provides a fluid, tear free gaming experience at highest performance. The AMD FreeSync Premium features a refresh rate of minimum 120Hz, decreasing blur and sharpening the picture for a more life-like experience. The LFC feature eliminates the risk of stutter in case the frame rate drops below the refresh rate.

ADAPTIVE SYNC

Adaptive Sync aligns your monitor's vertical refresh rate with the frame rate delivered by your GPU, making your gameplay and casual gaming experience even more fluid by eliminating stuttering, tearing and judder. This feature is also useful when enjoying videos and other visual media, for a smoother entertainment.
